Catherine Says Our '55 Iris Catalog Will Be More Beautiful Than Ever

R. B.

Gay, Glamorous, Glistening GLADIOLUS

THE KING OF CUT FLOWERS, gladiolus will do well in all sections of the country. Our bulbs are carefully grown, hand dug and cleaned to protect from bruising, and packaged with care. With a minimum of attention they will reward you with a beautiful display in your garden.

CULTURE DIRECTIONS included with each order.

MINIMUM ORDER. Unlike most growers, who refuse to fill orders for less than three dollars, we welcome orders of any size, large or small. Past customers know that we like to fill orders liberally. We shall continue this policy. Since parcel post rates are much higher proportionately on small orders, the larger the order the more liberally we can fill it. If your needs are few, may we suggest pooling your order with your neighbor for our mutual benefit.

PREPAID PRICES. Unless otherwise stated, all prices in this catalog include prepaid delivery to your door.

BULB SIZES. Large bulbs, designated by letter **L**, measure $1\frac{1}{4}$ inches or more in diameter. Medium size (**M**) are from $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter. Both sizes make fine flowers, with medium size often making spikes almost as large as those from larger bulbs.

SECOND CHOICE. As the season goes on, some kinds will be sold out. Will help us if you list a second choice in case we cannot supply all items on your order. Any substitution will be of equal or greater value.

SHIPPING TIME. Except for an occasional delay of a few days to avoid risk of freezing during unusual cold spells, orders are shipped immediately. However, if you wish us to put up your order and hold until a date you specify, we are glad to do this. Glad bulbs can not be supplied after the first of June.

Abu Hassan (K & M) Deep dark blackish blue. Medium size florets on straight stems. This one will make your neighbor look twice if he is not familiar with its blue-black lustre. (L 2—20c; 10—80c) (M 4—25c; 10—50c).

Arabian Night (K & M) A deep mahogany reddish-brown with a velvety sheen and a very narrow white line on the lower petals. (L 2—25c; 10—\$1.00) (M 3—25c; 10—75c).

Beacon (Palmer) Red salmon with large cream blotch in throat. (L 2—20c; 10—80c) (M 4—25c; 10—50c).

Benjamin Britten (K & M) Deep lavender with fine white lines attractively penciled in throat. Tall grower; good size. (L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Black Opal (Errey) Very deep, dark red that opens up to ten florets at a time. (L 2—20c; 10—90c) (M 4—25c; 10—60c).

Blue Beauty (K & M) Nice medium blue shading to red and purple markings in throat. (L 2—20c; 10—85c) (M 4—25c; 10—55c).

Buckeye Bronze (Wilson) Velvety red bronze. Its attractive color and sheen make it a favorite in this color class. (L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Burma (Palmer) Heavily ruffled deep rose. (L 2—20c; 10—90c) (M 4—25c; 10—60c).

Candy Heart (Salbach) Large pink with carmine marking in throat. (L 2—20c; 10—80c) (M 4—25c; 10—50c).

Casablanca (Majeski) Large ruffled white. (L 2—20c; 10—85c) (M 4—25c; 10—55c).

Chamouny (Baerman) This light cerise rose, of velvety texture, has florets edged with silver. Opens up to ten florets at a time on tall straight stalks. Bright, flashy and appealing. (L 2—20c; 10—85c) (M 4—25c; 10—55c).

Commando (Palmer) Large, striking scarlet. Tall spike. (L 2—20c; 10—85c) (M 4—25c; 10—55c).

Dieppe (Hassall) Deep salmon red with a darker blotch in the throat. The attractive florets have a very distinctive shape. (L 2—20c; 10—85c) (M 4—25c; 10—55c).

Elizabeth the Queen (White) This large, lovely ruffled lavender is one of the most popular glads grown. Opens 7 or 8 large florets at a time of handsome form and beautiful color.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Fiat Lux (K & M) Pure golden yellow of medium shade that opens up 8 to 10 attractive florets on tall upright spikes.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00).

Firebrand (Butt) Fine medium shade of red. Slightly darker in throat with white lines on lower petals. Opens eight or more at a time with many other florets showing color.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Florence Nightingale (Harris) A fine new white. Opens up to eight blooms on a tall, straight spike.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Hawkeye Red (Heaton) Attractive orange-red.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

King Lear (Palmer) Large reddish-purple. Its distinctive, pointed blooms set it apart from other glads.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

King Tan (Wilson) Large rosy tan.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Lady Jane (Lake) Here's a glad we like very much. Florets are clear deep cream with yellow lip petals, and are evenly spaced on sturdy spikes.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Leif Erikson (K & M) An impressive large creamy white. Opens 8 to 10 wide open flowers with many more buds showing color.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00).

Leading Lady (Johnston) Cream white sport of Picardy.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Maid of Orleans (Pfitzer) Tall pure white with slightly creamy accent in throat.
(L 2—20c; 10—80c) (M 4—25c; 10—50c).

Margaret Fulton Early salmon pink with rounded florets on sturdy spikes.
(L 2—20c; 10—80c) (M 4—25c; 10—50c).

Miss Wisconsin (Kreuger) Deep lavender rose. A strong and pleasing color.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Myrna Fay (Lines) Excellent medium shade of lavender. A shade or two more to the red side than Elizabeth the Queen. Blooms early.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Noweta Rose (Fischer) Deep lavender rose capable of sensational spikes. Sometimes opens as many as 12 florets at one time.
(L 25c each; 10—\$1.50)
(M 15c each; 10—\$1.20).

Oriental Pearl (Carlson) Very large lovely cream white. Makes some of the biggest florets we have ever seen on a glad.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Pactolus (K & M) Apricot-cream with orange-red blotches on the lower petals. Florets perfectly placed on straight stems of medium height. One of the most attractive novelties from Holland.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Pandora (B. Palmer) Beautifully clear soft geranium-pink with somewhat darker lines in the throat. Straight, sturdy spikes opening up to 10 florets at a time. Remains one of our favorites.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Patrician (Scheer) Lovely medium lavender. Opens up to seven very large recurved florets on a strong straight spike with excellent placement. Vigorous grower.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Phantom Beauty (Bastian) Clear light pink. Opens up to 10 blooms at a time. Very fine.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Picardy (Palmer) Soft shrimp pink with rose feather in throat. Still popular, but we like Spic & Span better.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Poinsettia (Weeks) Pure light spectrum red. Slightly ruffled with six to eight florets open on a tall spike. An outstanding variety.
(L 25c each; 10—\$1.60)
(M 15c each; 10—\$1.00).

Polynesie (K & M) Vigorous growing pure salmon, deeper than Picardy. Large round florets are slightly ruffled.
(L 15c each; 10—\$1.20).

Ravel (K & M) Violet blue with a reddish brown marking. Healthy grower producing tall, upright spikes. Florets of heavy texture are well spaced and well placed.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

R. B. (Upton) Large henna-brown on old rose base.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Red Charm (Butt) Very popular medium red. Consistently makes fine spikes with up to eight well placed blooms open at once.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Rewi Fallu (Australia) Velvety deep red, but makes rather stubby spikes.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Rosa Van Lima (Pfizer) Lovely pure clear pink. An early bloomer, and almost always the first to break through ground in spring.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Salman's Glory (Salman) Huge creamy white attractively marked with showy red blotch in the throat. Free-flowering and vigorous growing.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Sans Souci (K & M) Rich, glowing scarlet. Florets are of heavy texture and well placed on graceful straight spikes. This new variety from Holland is one of the best reds we have ever grown.
(L 25c each; 10—\$1.80)
(M 15c each; 10—\$1.20).

Sherwood (Pruitt) One of the best of the new purple glads.
Opens seven lightly ruffled blooms on tall spike.
(L 2—35c; 10—\$1.20) (M 3—30c; 10—70c).

Silcherlied (K & M) La France pink with deep bordeaux red blotch. Another new novelty from Holland.
(L 25c each; 10—\$2.00).

Snow Princess (Pfizer) Favorite white. Tall, husky grower.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Spic & Span (Carlson) The most popular glad grown, this deep ruffled pink has color and growth habits hard to beat. Blue ribbon winner at shows throughout the country.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Strawberry Peach (Salbach) Bright orange pink with soft scarlet blotch and feather.
(L 2—25c 10—\$1.00) (M 3—25c; 10—70c).

Sunspot (Roberts) Pleasing light apricot buff with red throat.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Surfside (Winsor) White with light red penciling in throat.
(L 2—20c; 10—85c) (M 4—25c; 10—55c).

Catherine Long admires Sans Souci, the big red glad from Holland.

Tivoli (K & M) Beautiful clear light rose. A valuable addition to the pink color class.

(L 2—25c; 10—90c) (M 4—25c; 10—60c).

Truelove (Klein) Clear, somewhat ruffled early shell pink of fine shade and form.

(L 2—20c; 10—80c) (M 4—25c; 10—50c).

Valeria (Pruitt) Light scarlet of unusual shade. Popular cut flower variety.

(L 2—25c; 10—90c) (M 4—25c; 10—60c).

White Gold (Scheer) Giant cream blending to gold in throat.

One of the most dependable varieties we have ever grown.

(L 2—20c; 10—80c) (M 4—25c; 10—50c).

Yellow Herald (Pfitzer) Lightly ruffled yellow with carmine throat lines. A very reliable and pleasing variety.

(L 2—25c; 10—90c) (M 4—25c; 10—55c).

Exhibition Mixed A fine assortment of mixed colors.

(L 10—75c; 25—\$1.50; 100—\$5.25)

(M 10—40c; 25—90c; 100—\$3.50).

Margaret Anne Long instructs sister Catherine in the finer points of flower arranging. Margie says make full use of your cut glads by pulling off the faded florets, trimming the stems and arranging the tips in a small bowl or dish.

ALL-AMERICA SELECTIONS

For many years, in trial gardens throughout the country, hundreds of flowers are tested in the All-America selections. Some years the discriminating judges fail to find a single flower that measures up to the high standards necessary for a winner.

This year, not one, but three flowers have won the coveted bronze medal awards. The 1955 award winners are:

COLUMBINE McKANA GIANT The culmination of 36 years work with columbines by G. E. McKana, this strain is a distinct and welcome improvement. Plants are taller, bushier and stronger. Flowers are larger in an exquisite array of colors, with longer spurs that flare back symmetrically like heavenly wings. The vigorous plants have heavier stems than other varieties and the color range leaves little to be desired. Good for partial shade as well as in sun. Incidentally, McKana Giant is the first perennial to win All-America honors in 18 years. Pkt. 35c.

PETUNIA PRIMA DONNA Developed here in Colorado by Charles Weddle and associates, Prima Donna is an extra large, fringed, bright rose pink that flowers in abundance on dwarf, compact, spreading plants of outstanding vigor and uniformity. This Grandiflora type petunia is a true hybrid. Seed can be produced only by care-

ful hand pollination of each flower. This makes the seed many times more expensive than an equal weight of gold, but the amazing growth from the hybrid vigor of each plant enables a few plants to cover lots of ground. Its low spreading habit makes Prima Donna perfect for long lasting effect in beds, window boxes and border. Pkt. of 100 seeds 40c.

CELOSIA TOREADOR This new cockscomb makes a dwarf plant 18 to 20 inches high with combs of a brilliant scarlet that are fluffier than other crested types. The foliage is bright green. The great center comb will be heavy, over 8 inches across, but some plants will bear small combs on side branches too.

Celosia Toreador makes a good cut flower. It is also valuable for a background in annual beds and it can be cut and dried for use later in the year. It's a mighty versatile flower. Pkt 35c.

LONG'S FLOWER SEEDS

ASTERS

All Asters, except Powderpuffs, uniformly priced at: Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 90c.

Powderpuffs An exciting new development in Aster culture. Plants grow about 24 inches high with as many as 20 blooms on a single plant. Characteristic upright growth habit permits the entire plant to be cut as one bunch. Very early. See color illustration on the inside back cover. Pkt. 25c.

Princess Flowers three inches in diameter have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals. Plants tall and branching.

Peach	Orchid	Deep Blue

LETTUCE

PREPAID

ALL VARIETIES below, except New York and Great Lakes: Pkt. 10c; oz. 25c; ¼ lb. 90c; lb. \$3.00.

Black Seeded Simpson

Grows quickly, making fluffy, loose bunch of tender, creamy leaves of delicate flavor.

Grand Rapids Light green leaves with fringed edges.

Iceberg Similar to Hanson. Crisp and tender. Fine for home gardens.

Prize Head Leaves crimped; tinged brownish-red. Early.

New York Also called Los Angeles, Wonderful, Mountain Iceberg, and Western Iceberg. Leading heading lettuce for market. Pkt. 10c; oz. 30c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.40.

Great Lakes All-American Bronze Medal Winner. A tight-heading, sure-to-head variety for home and market. Produces fine large heads, well rounded, very solid. Especially resistant to tipburn. Stands the longest of any lettuce without going to seed. Can be used as leaf lettuce at all stages of growth. The attractive crimped leaves are tender and delicious. Fills a long felt want for both back yard gardeners and commercial growers. The most certain to head of all large luscious varieties, often under most adverse condition, and in hot weather. Heads best of course in cooler months. Resistant to tipburn. The thick large leaves fold well over the head. Unlike most kinds, Great Lakes is very slow to run to seed. Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.80; ½ lb. \$3.25; lb. \$6.00.

To Make Head Lettuce Head

Lettuce will seldom head in hot weather, unless grown in shade. It is a cool weather plant, doing best very early in spring, or late in fall, as head lettuce.

Sowing head lettuce seed late in fall, just before ground freezes, is one good way to get an early start the next spring. Very early spring sowing—March or early April—is good.

Bear in mind that the ground should be good and rich, and that the plants should be thinned or transplanted to 6 to 10 inches apart. Then they should be hoed often, the oftener the better. You can't expect to pluck large solid heads of lettuce from a bed in which the plants are thick.

WATER MELONS

Prices: ALL AT PKT. 10c; OZ. 20c; ¼ LB. 60c; LB. \$2.00. Prepaid.

Early Canada Especially good in north or higher altitudes where growing season is short. Medium size, nearly round, with bright red flesh of good quality.

King and Queen (Winter Watermelon.) Variety light cream with green striping.

Kleckleys Sweet (The Rocky Ford.) Scarlet flesh. Solid heart. Sweet and sugary.

New Hampshire Midget Recently developed and widely advertised. Extremely early. Melons are somewhat smaller than a Honeydew. Thin rind; bright red flesh that is crisp and sweet.

Klondike The favorite strain. Flesh deep red, stringless.

FINE SEED FOR FINE LAWN

No one thing does more to give a house the appearance of a home than a fine lawn. Other landscaping will help, but a smooth, bright attractive lawn is basic.

Cost is low when you consider that a lawn once properly planted and given reasonable care is an investment that will last for years and years.

It will save you money to prepare your seed bed thoroughly before sowing seed.

New lawns should be thoroughly worked, leveled, watered heavily to show up any uneven settling; and then leveled once more.

The more care before sowing the seed the better the results. Otherwise seed will wash to the low spots and make your lawn spotted.

Sow part the seed one way and then some more crosswise, so as to avoid streaks. Rake well before and after sowing. Water gently so often that soil never dries out until lawn is green.

Very important not to let soil dry out just as seed is sprouting. At this stage, seed is very delicate and will die if allowed to become dry.

White Dutch Clover germinates quickly and is valuable for giving quick results and for shading and protecting the slower growing Kentucky Blue grass.

Please note. In average conditions, clover seed will sprout within a week or sooner, but blue grass may take as long as three weeks. Do not relax your watering program as soon as clover gives the lawn a green appearance. You may let the blue grass die if you do. Keep moist until blue grass is well started. Then increase intervals between watering until eventually lawn is given a thorough soaking with several days skip until next watering. This will keep moisture down deep and make for deep-rooted turf more resistant to hot, dry spells.

Kentucky Blue Grass, the basic seed for all lawns, is again in short supply this year because of a small harvest. We may not have enough to meet the demand, so suggest ordering early lest you be disappointed.

In addition to regular blue grass, we have available that new, widely publicized strain, Merion Blue Grass. Cost per pound is higher, but will cover over twice the area of ordinary blue grass, so on basis of results is comparable price-wise.

Best White Dutch Clover

The finest and purest it is possible to obtain. Use in proportion of one pound clover to every five to ten pounds blue grass. $\frac{1}{2}$ lb. 80c; 1 lb. \$1.50; 5 lbs. \$7.00. Prepaid.

True Kentucky Blue Grass

Pure, high-germinating seed of fine quality. Sow one pound to each 250 sq. feet. $\frac{1}{2}$ lb. 90c; 1 lb. \$1.75; 5 lbs. \$8.00. Prepaid.

Blue Grass and Clover Mixed

Carefully mixed by us from our own stocks. Sow one pound to each 250 sq. feet. $\frac{1}{2}$ lb. 90c; 1 lb. \$1.75; 5 lbs. \$8.00. Prepaid.

Mile High Lawn Blend

A very satisfactory grass mixture that gives excellent results. Composed of 50% Kentucky Blue Grass, 13% Bent grass, 7% White Dutch Clover, 13% Red Top grass and 17% Rye grass. $\frac{1}{2}$ lb. 85c; 1 lb. \$1.65; 5 lbs. \$7.90. Prepaid.

Merion Blue Grass

The most outstanding grass development in years, Merion Blue Grass has an underground root and rhizome system that gives it such amazing vigor it helps to crowd out the No. 1 lawn enemy, crab grass. Needs less water and can be cut closer without injury. One pound is sufficient to cover 750 sq. feet. $\frac{1}{2}$ lb. \$2.65; 1 lb. \$5.00. Prepaid.

Merion Blue Grass Formula

Contains 40% Merion Blue Grass plus Penn State Fescue, Highland Bent and Red Top. Ideal for spring sowing. The other grasses come up quicker and give a complete cover quickly until the Merion has a chance to get established and gradually take over. Sow one pound to every 750 square feet. $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.75; 5 lbs. \$12.50. Prepaid.

Helpful Hints

ALYSSUM. The favorite border plant. Easy to grow. Sow where plants are wanted for beds, edgings or borders. Cover $\frac{1}{4}$ inch. Thin to 5 to 6 inches.

ASTER. Not necessary to start the plants inside. Sow outdoors from real early spring to well into May. Sow in beds or rows. Cover one-fourth inch. Thin or transplant to rows 16 to 20 inches apart, 6 to 10 inches in row.

The improved wilt resistant strains overcome most Aster troubles, except the "yellows", which is caused by tiny hoppers that carry disease from one plant to another. Growing under cloth prevents yellows. Asters thrive best in a little shade. East side of a building seems to suit them fine.

BABY'S BREATH. (*Gypsophila*). The annual (often called Angel's Breath), white or rose, comes quickly from seed sown in garden, blooming in a few months. Good idea to make several sowings so as to use all summer and fall with bouquets of other flowers.

The perennial is white. It blooms second year from seed. A root will last for years, forming a large clump in time. Double best for drying. Sow very thin and cover lightly. Thin to a few inches apart. As the roots increase in size, thin still more. If want all double, pull out the singles. Roots easily transplanted also. (Double never comes all double from seed.)

BACHELOR'S BUTTON. They grow like weeds, yet the improved sorts are delightful for garden display or as cut flowers. Florists use lots of the double sorts for bouquets and designs. Plant the double varieties. Nothing much to it—just sow the seed as you would aster seed and thin to 6 or 8 inches.

BALSAM. (Touch-Me-Not.) Children's delight. Sow May, $\frac{1}{2}$ in. deep. Thin to 8 inches.

CALENDULA (Scotch Marigold). Another "easy-to-grow" flower. Sow early, medium or late in spring. Handle about same as asters. Stands lots of frosts, ice and snow. "It's a glutton for punishment."

CALIFORNIA POPPY (*Eschscholtzia*). Not easy to transplant, though can be done when plants real small. Better sow where wanted. Very hardy. Cover lightly, hardly one-fourth inch. Thin to 5 or 6 inches each way.

CALLIOPSIS. May be sown quite early outdoors. Cover $\frac{1}{2}$ inch. Thin to 10 inches.

CLARKIA. Lovely carnation-like flowers, resembling the flowering almond. Charming in garden, and exquisite for indoor bouquets. Buds will open after cutting. Partial shade best. Thin to 5 to 7 inches.

COLUMBINES. Bloom second year from seed. Like loamy soil, and partial shade best. Slow to germinate, especially the Rocky Mountain strain. Germinate best if sown very early spring, or just before ground freezes in fall. Thin to 6 to 8 inches.

COSMOS. Being tall, it should be grown as a background, or in center of bed. The early large-flowered kind is good. The newer "Sensation" strain still better. Sow April and May. Cover $\frac{1}{2}$ inch. Thin to 10 inches.

DELPHINIUM. Often exasperatingly slow to germinate. Hard to start in hot weather. Loves cooler weather. Follow suggestions given for Columbines. Cover seed about half inch. Avoid letting water stand on crowns of plants. Do not sprinkle plants late in day or evenings. Fine sulphur dust checks mildew.

FOUR O'CLOCK. Sow from middle of April to last of June. Cover one inch. Thin to 8 or 10 inches. Try this for a hedge if need something of the sort in a hurry.

GODETIA. Thrives best in cool moist soil, and some shade. Nice for cutting. Buds open along stem much like the *Gladiolus*. Thin to 7 or 8 inches.

GOURDS. Plant when and as you plant cucumbers and melons. Tender. Wait till danger from frosts over. When matured and dry, give an even coat of shellac or varnish, if wish to keep as is for pets.

ICELAND POPPY. Sow where wanted, as hard to transplant, except when plants very small. Take plenty soil with roots if move them. Early spring or very late fall best time to sow, though with care can be started any time in summer. Danger of sun killing just as come up. Prevent loss by using temporary light cloth shade over bed or row till plants get a "toe holt." Cover seed lightly. Thin to 4 to 6 inches.

LARKSPUR. Still another that is a bit slow to come up, and likes early cool spring weather best, for germinating. Cover little less than half inch. Thin to 8 or 10 inches.

MARIGOLD. These old favorites of grandmother's garden are still going strong, increasing in popularity with the improvement of the strains of both the tall and dwarf types. Tall sorts should be given plenty of room, because they branch freely. Should have at least a foot of space to the plant. More, still better. Dwarf plants should be thinned or transplanted to about 6 inches apart. Sow seed any time in spring after soil is warm. Cover one-third inch.

MEXICAN FIRE BUSH (*Kochi*). A few plants well placed, or a hedge of them, are effective. Turns red in fall. Grows like a weed. Give each plant 18 to 24 inches at final thinning. **Warning.** In a few sections, this gets out of bounds and becomes a pest.

MORNING GLORY. The old common kinds easy to germinate. But some of the new Mammoth kinds rather stubborn. Soaking seed in lukewarm water 12 to 24 hours helps. Another way is to chip off a little of the shell or rub seed on sand paper or cement wall to grind off a spot in shell. The main idea is to let moisture in, and yet not damage the "meat" especially the ends. Sow after ground warms up.

NASTURTIUM. So easy to grow that not much need be said. The new double sorts now used almost exclusively. Double kinds not like a rose, but often semi-double.

PETUNIA. Seed so fine that you are likely to sow too thick. Also, to cover too deep. Barely cover seed by sifting soil or sand over the seed. Press down with board after sowing. Cover with thin cloth till plants just peep through. Be careful. Watch daily. Bloom soon from seed sown outdoors. Give each plant 6 to 8 inches.

PHLOX DRUMMONDI. Annual, not the perennial that grows from root divisions. May be sown early in spring. Seed slow to germinate. Have patience, and don't neglect. See that they have moisture daily. Sow thinly in rows one foot apart. Cover one-fourth inch. Thin to 4 inches.

PORTULACCA. Don't sow till weather plenty warm, as likes HOT weather. Low growing and lovely for certain locations.

SALPIGLOSSIS (Velvet Trumpet). Will be grown much more extensively when more people learn to know it. Good idea to start indoors or in hotbeds, then transplant. But may be sown in the open when ground is warm. Cover one-fourth inch or less. A little slow to come up. Thin to 6 or 8 inches.

SNAPDRAGON. The improved Rust-Resistant strains make this always popular flower even more desirable. Seed germinates easier, plants more vigorous and have cleaner foliage, flowers large and lovely. Blooms first year from seed, and with a little protection usually lives over winter outdoors, blooming early the next year.

Iridescent Iris: *July to November*

We are among the largest growers of fine Iris in the world. Every year we add new varieties to our already wonderful list of breath-taking beauties.

Our 1955 list will describe over 300 varieties, with more than 40 of these pictured in full natural color.

Also, many prices will be reduced so much that you need not wait longer to have them in your own gardens. This applies especially to the newer kinds that are always high for a few years or more.

Summer and fall is the ideal time for dividing the clumps and setting out the new "toes." We start digging and shipping right after we finish celebrating our country's birthday on the Fourth of July. From then until November we send out these glorious new Iris to all parts of the United States.

Our 1955 Iris catalogue will be mailed in April or early May. If you have ordered iris, seeds or any other merchandise from us within the last two years you will be sent a copy automatically. If in doubt, drop us a card and we will reserve a catalogue for you.

SWEET PEAS. Best results come from early sowings. The idea is to give the plants a chance to get deeply rooted early, so will stand the summer heat better. An ounce of seed will sow 15 to 20 feet of row.

VERBENA. Never stops blooming until end the season. Start indoors or wait till ground well warmed, late April or early May. Or, sow late in fall. Plants spread. Thin to 10 or 12 inches.

ZINNIAS. Give rich ground, full sun, moderate cultivation and lots of water when they begin to bloom. Sow seed about 6 days before usual date for last spring frost, dropping a seed every few inches. Thin to 8 or 10 inches in rows 2 feet apart. Even 15 or 18 inches in the row is none too much, for plants branch rapidly if they have room. Handle very carefully when cut for bouquets, as the gigantic blossoms are likely to break the stems just below the flowers, if you "treat 'em rough."

Thank You

Everett C. Long

As we enter our 50th year, I'd like to thank our friends whose loyal support has made possible the success of our business.

Founded in January, 1905, by my father, the late J. D. Long, we have tried to operate in a manner that will warrant your continued faith and confidence.

It is most gratifying to hear every year from old friends whose orders have been recorded on our files for thirty to forty years.

With thanks again we wish you bountiful, beautiful gardens for '55.

Everett C. Long

Terms of Sale

All goods are priced prepaid unless otherwise noted.

We guarantee safe delivery. Please check shipment on arrival to see if all items ordered are present and in good condition.

Notify us promptly if everything not satisfactory. We want you to be pleased, so don't be backwards or bashful about letting us know if we have failed to achieve our goal.

In order to keep overhead expenses down and give you the most value for your dollar we must insist on cash with order, since we have no credit department.

Money order, postal note, personal check or bank draft best way to remit. Please do not send stamps or coins unless for very small amounts. Always a chance they will get lost in the mails. And remember to seal the envelope, too.

We discourage C. O. D. shipments. Recent postal rate increases raise the cost to you. No. C. O. D. shipments without $\frac{1}{4}$ cash in advance.

Goods priced prepaid will be sent by parcel post or express, our option. But if one service is much better for your convenience than the other, please let us know and we will try to ship best for you. All small shipments of less than eight or ten pounds will go parcel post.

We endeavor to supply you with highest quality seeds and bulbs. However, since they are grown beyond our control, we necessarily must limit our liability to the purchase price of the seeds or bulbs.
